Education

MIT ADT University

Bachelor of Technology in Computer Science & Engineering (CGPA: 8.74)

Pune, India

2023 – 2027

Experience

Elite Softwares

Full-Stack Developer Intern

Pune, India

Nov 2024 – Mar 2025

- Engineered and integrated 10+ RESTful APIs using Python and Django, powering core application features for high-traffic production workflows.
- Implemented robust authentication and request validation layers, reducing invalid security requests by 25%.
- Designed relational database schemas and optimized end-to-end data flow across frontend and backend services.

Projects

Posture Detection System | Python, MediaPipe, OpenCV

Mar 2025

- Engineered a real-time computer vision monitoring system achieving 90%+ detection accuracy at 25+ FPS on live webcam input.
- Designed a custom calibration algorithm that reduced false-positive posture alerts by 30% across diverse body types and camera angles.

Sanjeevan - Real-Time Healthcare Platform | MERN Stack, WebSockets, LLMs

Aug 2025

- Architected a telemetry pipeline streaming patient vitals from ambulances to hospitals with under 2s latency to streamline emergency response.
- Built a multilingual AI assistant supporting 3+ languages and an automated hospital-matching engine, cutting manual dispatch selection time by 50%.

CrowdPulse - Real-Time Crowd Monitoring System | MERN Stack, YOLO, Computer Vision

Nov 2025

- Processed real-time video streams at 15+ FPS to detect high-density zones with 85%+ detection accuracy using custom vision models.
- Implemented automated SOS escalation workflows and predictive risk scoring, cutting emergency coordination time by 40% in simulated scenarios.

Technical Skills

- Languages:** C, C++, Python, Java, JavaScript, SQL
- Frameworks & Web:** React, Node.js, Express, Django, REST APIs, MERN Stack
- AI / Machine Learning:** OpenCV, PyTorch, TensorFlow, MediaPipe, YOLO, NLP, LLM Integration
- Tools & Developer Utilities:** Git, GitHub, Figma, VS Code, Postman

Leadership & Achievements

- National Hackathon Finalist:**
Ranked in the Top 20 out of 500+ teams across 5+ hackathons, advancing to the national finals in 2 major competitions.
- Technical Team Lead (Swift Coding Club):**
Led a 10-day hands-on workshop on Swift and SwiftUI, mentoring 50+ students in iOS app development.
- Technical Team Member (Geeks For Geeks Coding Club):**
Conducted DSA and problem-solving bootcamps to aid interview prep.
- Best Delegate Award (Model United Nations):**
Recognized for excellence in leadership, strategic negotiation, and public policy debate.
- Competitive Programming & Open Source:**
Solved 200+ Data Structures & Algorithms problems on LeetCode and maintained 100+ GitHub contributions.

Certifications

- NPTEL:** Design and Analysis of Algorithms
- AWS Academy:** Cloud Foundations Certification
- Cisco Networking Academy:** C++, Operating Systems, and Computer Networks
- LinkedIn Learning:** Introduction to Generative AI
